Middle School General Science Description

This course gives middle school students an opportunity to explore a variety of science topics where the inquiry method will be primarily implemented through hands-on activities. It will focus on how science works from a biblical perspective emphasizing the use of basic science process skills to make thoughtful conclusions. Topics covered will include: Simple machines, Archeology, Paleontology, Geology, Fossil and Geological Record, DNA and Life, Classification of Life, Energy of Life and the Systems of Human Body.

Students who complete the course in due diligence and complete the assignments will be prepared to go to next level which is High School Science.

Textbook: Apologia *Exploring Creation with General Science, 2nd Edition* book and the accompanying Solutions and Tests Book.
